## Project Details

<b>Designation:</b>	Summer Analyst
<b>Type:</b>	Other (Model Risk Governance & Review)
<b>Location:</b>	Mumbai/Bangalore
<b>Project Details:</b>	<p>Global Risk &amp; Compliance Program – Model Governance Group - Analyst</p> <p>Global Risk &amp; Compliance</p> <p>The Global Risk &amp; Compliance Group is an integrated specialist team that helps facilitate risk management and compliance across the firm. The firm's global risk management framework is designed to identify, assess and manage strategic, credit and investment, market, and operational risks. Be part of the Global Risk and Compliance Group and develop expertise in specific risk management or compliance capabilities across the lines of businesses or corporate functions within the firm. Work directly with our experienced risk professionals across the globe and gain valuable insights and industry relevant expertise.</p> <p>What to Expect</p> <p>Model Governance Group</p> <p>Financial Institutions routinely use models for a broad range of activities including analyzing business strategies, informing business decisions, identifying and measuring risk, valuing exposures or instruments, hedging derivative positions, etc. Model Risk arises from the potential adverse consequences of making decisions based on incorrect or misused model outputs and reports, leading to financial loss, poor business decision making, or reputational damage.</p> <p>As part of the firm's model risk management function, J.P. Morgan's Model Governance Group (MGG) is charged with performing model validation activities, providing guidance on a model's appropriate usage in the business context, evaluating ongoing model performance testing, developing model risk policy and control procedures, and ensuring that model users are aware of the model strengths and limitations.</p> <p>You'll make an impact by</p> <ul style="list-style-type: none"><li>• Performing independent model reviews of quantitative models used by trading and business teams, models used by risk managers and models used for regulatory reporting</li></ul>

- Performing assessment of the conceptual soundness of model specification, the appropriateness of the methodology for its intended purpose, reasonableness of assumptions and reliability of inputs
- Conducting performance analysis and implementation testing. Identify and highlight limitation of methodologies, identify and quantify misunderstood or understated risks
- Assessing completeness of testing performed to support the correctness of the implementation
- Working with model developers and model users across the firm to understand methodology and usage
- Liaising with other Model Governance groups in relevant coverage areas across the firm

#### About you

We're looking for highly motivated individuals with a passion for developing innovative solutions to support clients around the world.

#### General requirements

- Quantitative background ideally with Bachelor's/Master's degree in Maths, Science, Finance, Engineering, Statistics, Quant Finance etc.
- Strong quantitative, analytical, and problem solving skills; knowledge of probability theory, calculus, statistics, mathematical finance, econometrics, numerical methods
- Knowledge of finance industry, particularly in modeling, valuation, risk and capital
- Good programming skills would be a plus, but not a requirement
- Strong communication and interpersonal skills
- Strong project management and organizational skills; ability to multi-task and meet deadlines
- Ability to work independently, with remote supervision
- Risk and control mindset: ability to ask incisive questions, assess materiality and escalate issues
- Pursuing a qualification degree with expected completion date in 2022/2023

#### Join Us
