

Training Notification Form, IIT Delhi

Company Overview

Name: Atlassian

Website: www.atlassian.com

Company Type: Information Technology

Description: We believe behind every great human achievement, there is a team.

From medicine and space travel to disaster response and pizza deliveries, our products help teams all over the planet advance humanity through the power of software.

Our mission is to help unleash the potential of every team.

Armed with a credit card and a dream, two college friends, Mike Cannon-Brookes and Scott Farquhar set out to create Atlassian. In 2002, they didn't know what kind of company Atlassian was going to be, but they knew exactly what it shouldn't be—an environment where they had to conform rather than be who they authentically are.

We're a team of 7000+ Atlassians supporting an international group of 250000+ customers. We build tools like JIRA, Confluence, Bitbucket, Trello, etc to help teams across the world become more nimble, creative, and aligned.

Project Details

Designation: Software Engineer Intern Role

Type: Information Technology

Location: Team Anywhere (Work from anywhere) - Interns are free to also work from Bangalore office if they wish to.

Project Details: Join Atlassian as an intern and spend your summer with us having a direct impact on how millions of users collaborate and use software. Want the freedom to be creative and build your dreams? How about the time and resources to make them a reality? If yes, Phenomenal! The most amazing problem-solvers like NASA rocket scientists and Tesla engineers are coming to us for solutions. We're in the business of developing software to help teams everywhere get amazing ideas on the ground and into the world. That means we need our own team to push boundaries daily. At Atlassian, You'll be encouraged to use your creativity and try new things. You'll be guided (as we also are) by our core values, and will be supported by some of the best minds in tech. We want you to have everything you need to do amazing work from the get-go.

More about You - Internship Program

1. You love to innovate and build your dreams.
2. You are driven and passionate about the opportunity to work on intriguing and unique challenges.
3. A natural teammate, inquisitive, and enjoy dissecting and tackling hard problems.
4. Whilst passionate about your work and delivering outstanding quality, you're still able to go fast, which means sharp instincts when it comes to the workload and using your time wisely.
5. You'll learn a lot, but you'll also need to be able to stand up for your own ideas when the time comes.

On your first day, we'll expect the following:

- Ability to write clean, efficient code with minimal bugs.
- Passion for collaborating with colleagues to build technical solutions to hard problems.
- Strong foundation in Computer Science, with an interest in industry trends (technology, methods, and tooling)
- Nice to have: experience with Java, Python, JavaScript, or other similar programming languages
