Project Details

Designation: Internship UX/UI designer

Type: Information Technology

Location: Full remote

Project Details:
【Internship Project】
IBY solution can analyze online communication. That can apply to many industrial domains and business functions to solve issues. In this internship, we expect you to design IBY solutions to some specific use cases, such as domains of online education, healthcare and business functions of sales, employee communication management, evaluation of psychological safety etc.
Here "design" means the full process of design from initial UX/marketing research to final UI design. It is ok to assume the Indian market.

Each intern picks up one use case and makes their own task plan and execute plan. Throughout the intern period, we will have weekly meetings to share updates and discuss issues and communicate every day on Slack.

Also, we will select some use cases that developer interns create as a prototype. So you need to communicate with developers as well.

【Skills】
Must have skills and personality:
-Experiences of UX research activities such as desktop research, user interview, ethnography research in any industrial domain.
-Experiences of UX design activities such as definition of persona, to create customer journey map based on results of UX research.
-Experiences of UI design by using prototyping tools such as Adobe XD, figma.
-Digital illustration skills.
-People who can discover and solve problems by themselves.
-People who have leadership and professionality(commitment to task execution, self and quick learner)

Nice to have skills:
-Front end(HTML, CSS, JS) development experience
