Project Details

Designation:	Internship Web / Application Engineer
Type:	Information Technology
Location:	Full remote
Project Details:	【Internship Project】

Project Details (continued):

【Internship Project】
IBY solution can analyze online communication. That can apply to main industrial domains and business functions to solve issues. In this internship, we expect you to develop new features and do some technical PoCs. For example, "video conference function" like Zoom, Meet and "advanced analysis" like tableau and "information sharing platform" like github for software.

Each Intern picks up one theme and makes their own task plan and execute plan. Throughout the intern period, we will have weekly meetings to share updates and discuss issues and communicate every day on Slack.

This internship may separate two parts. First part is an individual project and the second part is a team project. In the team project, we will expect you deveple prototypes that are designed by UX/UI interns as a team.

【Skills】
Must have skills and personality:
-Front end development experience in web service by Reactjs.
-Backend end development(nodejs/python)
-Basic information science knowledge(TCP/IP,os, system architecture)
-People who can discover and solve problems by themselves.
-People who have leadership and professionality(commitment to task execution, self and quick learner)

Nice to have skills:
-Machine learning basic knowledge in computer vision.
-Cloud operation (aws)
